FIAM ACCESSORIES. A VALUABLE CHOICE

Fiam accessories represent a 'valuable choice' because they are designed and built to guarantee **long life, great reliability and the best performances** of the air and electric tools.

These advantages results in less maintenance and repair costs and a considerable increase of the **efficiency of the productive cycles**.

Alike all Fiam solutions, accessories **respect ergonomic criterias and maximum operator's safety**; they are designed with great attention to **environment safeguard**.

Available in customized version based on the customer's requirements, they are able to satisfy every customer's need.

Selection of tool, accessory and compliance with correct way of use are the factors that highly contribute in warranting "job quality", by means of an ergonomic workplace design: an essential base of worker health, productivity and finished product quality.

FIAM SERVICE: ALWAYS CLOSE TO ITS CUSTOMER

Fiam, together with its solutions, offers a wide range of **services in order to optimize, in terms of safety and ergonomics, the productive processes of its customers**: from the choice of the tools and the accessories to the suggestions about correct operator's posture and the correct use of ergonomic tools.

For all further details, please apply to Fiam Technical Consultancy Service.

Ergotech project

Having full knowledge of the ergonomics needs and of the safety of the operator, Fiam optimizes the performances of its tools and offers consulting and qualified training for the correct use

To deepen the issues on ergonomics and safety in industrial tightening operations, ask to Fiam Customer Service info@fiamgroup.com for reading our publication.

Accessories for every productive need

These accessories are manufactured with high-quality materials through precise and accurate processing that, together the treatments, guarantees **great resistance to breakage and wear**.

Namely, these treatments prevent dimensional changes and warrantee **resistance to torsion loads conveying to the screw the greatest part of torque the screwdriver supplies, avoiding dispersion**.

The models are **suitable for different types of screws, nuts, bolts** existing on the market (with the different heads or imprints: hexagonal, slotted, cross-slotted...) and they can have different dimensions depending on the production needs.

Special customized accessories based on the customer's drawing are available upon request.

For all further details, please apply to the **Fiam Technical Consultancy Service**.
